

# HIGHER EDUCATION LMS

Green Education LMS (K20) helps Colleges and Universities to deliver education in an organised and engaging way. It gives your learner an enhanced gamified learning experience., which in return provides you with satisfied clients. Its provides you with your brand enhancement.

A decorative wavy line on the left side of the page, composed of four segments in pink, orange, green, and blue, curving from top to bottom.

## **Easy Intergration with Zoom, GMeet etc**

Its important that your LMS should be able to deliver blended training with online conferencing tools.

01

## **Time Table and Calendar**

One can easily see the no. of classes and session along with the topics to be covered in the session with timings of the session

02

## **Attendance and notification**

Each session records attendance of the learner and also notifies if someone has not attended the same

03

## **Learning Path and Automatic Semester Promotion**

Create a Learning path for the learner and Once the student completes the defined credits for a semester as per the college or the university they can be automatically promoted to next semester

04

### **Reports and Analytics**

Easily track and analyse the reports of your learner and give improvisations

05

### **Quizzes and Assignments**

Create Gamified Quizzes and Interesting assignments using our creative authoring tools

06

### **Socialising and Social Wall**

Easy to create groups and Teams and coordinate, learners can privately chat among the students and with the teacher. Organisation shall have its own Socaial wall similar to facebook.

07

Learning is a holistic process and each student is unique in their own abilities, feature of differential learning from Green LMS makes it possible to provide online holistic development of the learner.

08

## Green LMS is highly customizable, can be easily integrated with any ERP or Businesses & Enterprises software with Single Sign On
